For Immediate Release:

Monroe County 911 Coordinator Now Hosting Interactive Map on Website

Swiss Valley Associates Inc. (SVA), 911 Coordinator for Monroe County, now has an interactive map on their website which shows all known address points and house numbers in the County. SVA is making this information available to Monroe County residents. The website is <http://www.svaeng.net/911map.php>. The map shows a flag at each address point. Clicking on the flag will display the house number. Note: In the interest of preserving privacy, only the house number is shown. This prevents misuse of address information for purposes such as mass marketing, etc.

The Monroe County Commissioners have contracted with SVA to provide 911 coordination services since 2006. These services include addition and revision of address points on the digital 911 map in the Sheriff's Office. Please contact SVA at 740-483-2351 if you find an address that is not in the correct location. New address applications are available from the Monroe County Auditor's office. Your input is valuable because the accuracy of the database is essential for efficient response to 911 calls. Check the SVA website for future updates and additions.
